Report of the Trustees of the Greeley Public Library.

The library was opened to the citizens of the town for the loaning of books, June 20, 1894.

The number of books selected from the library of the late Dr. A. J. Greeley was 1878.

From the proceeds of a lot of old books sold by the trustees, they purchased eleven new books, making the total number to be credited to Dr. Greeley's library, 1889.

The state, through the board of library commissioners, furnished 100 new books.

Citizens of the town and others have donated 35, and the trustees have bought 88 new books, making the total number of volumes now in the library, 2112.

A catalogue has been prepared and published, containing a list of all the books that were in the library at the time it was prepared.

A supplementary list of the books since added will be found appended to this report.

Catalogues may be found at the library where they will be sold by the librarian at 25 cents each—the proceeds of which will be expended for the purchase of new books, or for other incidental expenses.

Public libraries have become to be considered a public necessity; and supplementary to the common school as a means of education.

The report of the librarian showing the number of cards issued and books loaned during the first eight months of the existence of the library is very gratifying.

The interest thus far has been as great as could have been expected at the beginning. We trust it may extend until all our citizens—and especially the young—shall receive the benefits it affords.

REPORT OF THE BOARD OF EDUCATION.

To the Citizens of the Town of Hudson:

As the school year closes, your committee wish to submit their annual report and would say that it will differ somewhat from those of previous years, as we wish it to be practical, bringing *facts* to parents and tax payers for their consideration.

CONDITION OF THE SCHOOLS.

It is an old but true saying, "that the teacher makes the school." We accept this as a truth and would say, we have been successful the past year in securing teachers who have proved themselves, conscientious, faithful workers. Some have met with larger success than others, which depends *somewhat* upon the influences, by which they are surrounded. As we visit their schools and observe methods employed, we have been pleased to *sustain* them. Some have been aided with hearty co-operation from parents and scholars, while others have been troubled from the day of their entrance into the school until the close of the term. In the successful schools, we invariably find order, promptness and thoroughness. These are things upon which we insist, considering them the basis of success. We have among our teachers, those who bring to their schools, facts gathered from nature, and varied subjects, being able to combine this knowledge with the assigned book lessons, thus making the education of their scholars practical.

There are three schools of *desirable* size; these are found in districts 4, 5, and 6. In these rooms we see enthusiasm, children anxious to excel, working with eagerness to "outdo" those with whom they are classed. They are bright-eyed and

active and we are free to say that it is truly delightful to visit these schools. We hear few complaints from these districts for there is work enough to keep the minds of the pupils employed, the teachers also having no time to loiter. The remaining three schools are small in *some* of *these* districts, a state of discontent abides, a teacher may be truly faithful in his or her work, but the scholars being few, there is nothing to excite enthusiasm. (in many instances, one child composes the class,) and the work doubtless becomes to them drudgery, dissatisfaction ensues, dull eyes, listless behavior, an "I don't care manner" prevails, they have no interest, and after carrying their complaints to the parents are often withdrawn from the school, the fact being published far and near "that the *school* does not amount to *anything*." The registers tell the story, and in most instances of this kind, we find the parents have not visited the school, or manifested interest in anything pertaining to it. Just here, we would say that in a clipping from a newspaper we read that in the last 10 years, in Central N. H., the *district* school attendance, has diminished, in many places, to such an extent that it is almost impossible to call the handful of children a school that gather in that capacity, and that the only remedy is to concentrate the pupils in fewer schools in convenient sections of the town, providing a public conveyance to take the children from their homes, returning them at night.

To your committee the idea is favorable of consideration. If not practicable to have the schools all located in one section, have the remaining schools consolidated and occupy other central locations, thus creating larger schools, fewer houses to keep in repair, less number of teachers to pay and greater advantages for the pupils, in this way, nearing the time when *graded* schools will become a *fact* to the people of Hudson. At the school meeting of 1894, Dr. D. O. Smith offered the following resolution :

Resolved—that we deem it expedient that the schools No. 1 and 3 be united or consolidated with No. 2 and 4 the *ensuing*

year, or as the judgment of the school-board may determine. It was voted by the town, and to your committee this seemed a timely arrangement. As soon as carried into effect, the "spirit of Pandemonium" was apparent, antagonism to all propositions that could be made was the rule. Some of the pupils in the disaffected districts have remained at home during the year, receiving instruction there. As the children were small, we would not question the *wisdom* of the parents. Those that have carried the children have provided well for their comfort, in no instance has any accident occurred.

EXPENSES.

In securing our teachers we have endeavored to arrange salaries economically, *they* are obliged to pay \$3.00 per week for board throughout the town. Regarding repairs we have expended as little as possible, but before another winter, considerable expenditure, on some of the buildings will be required to make them comfortable. As there was \$200 00 less appropriated at the last school-meeting than has been allowed heretofore, the tax-payers will observe that we have not *over-run* the appropriation. We received a petition in January, headed by Oscar Armstrong and signed by others asking that a check-list be furnished, to be used at the coming school-meeting, if the district so voted. We have complied with this request and the check-list is ready for your *acceptance*.
